

My comment is against Low Power FM, if it will interfere with radio stations such as K-LOVE, which I hear on 91.9 in my area. K-LOVE supports wholesome values and carries positive and encouraging messages, which positively impacts so many people who tune in.

A big draw for me is the lack of profanity and sexually suggestive material, which is heard so often on other radio stations. I am uncertain what your goal is in making this change, but please rethink this option. K-LOVE offers programming that draws both children and adults, something not many radio stations offer.

I thank you for taking the time to read my message, and I hope that I and others who respond will convince you to make the right decision.
